

# November

## Grade 5 Newsletter – November in Review

Introduction... We are continuing to work hard and stay resilient even when we are quarantined and online. Students have been very patient and ready to adapt to any situation that is thrown at us and for that I am very grateful.

In English Language, we have started the second unit in the Cornerstone books and began to look at dialogue and how it enhances a story. We are

working to master reading comprehension and review many grammar topics.

In Mathematics, students have been tackling perimeter, area, capacity, and volume. We have been looking at finding volumes of both regular and irregular polygons. Students are encouraged to practice this at home.

In Social Studies, we have finished the first

half of the unit and are now focusing on how Europeans began building communities in the New World.

In Science, students have been able to experiment with weather and even try to create raindrops in the classroom. We have looked at different storm weather clouds and will continue to cover climate and weather forces.

Happy November!

Ms. Kepa
