

May

Grade 8a Newsletter May in Review

Introduction...

It is hard to believe that the eighth graders are presently writing their year-end exams and we only have about four weeks left of the school year. May has been an eventful month, with nicer weather and so many fun learning activities.

We also have a fantastic four weeks ahead of us before the students move on to High School.

In English Language,

We completed a speaking contest at the beginning of May, and It was great to see the students prepare speeches on so many interesting topics. We are also working through Unit five of our Keystone books which is all about resilience and perseverance. We also reflected on the school year and put advise for next year's eighth graders up on the bulletin board.

In Mathematics,

We looked at transformations as well

as reflecting and rotating objects in the X and Y axis. The students also prepared their own Math tests and attempted to solve their classmates' questions.

In Social Studies, We learned about the changes in Canadas immigration policy during the early 1900s and the importance multiculturalism in Canada.

In Science, We looked at the density of various objects and how to calculate density.

Happy May!
Mr. Joseph

Pictures, pictures, pictures!

IMPORTANT DATES:

Tuesday, June 14 is Canada day at the school and all students should wear red colour clothes to school.
