

# MAY CLASS UPDATE!

Grade 4 with Mr. Riley

Summer Is Almost Here!

## English language arts

Students finished reading Charlotte's Web and made an illustration about their favorite and least favorite part. They also wrote more stories in class about animals, time travel, and what they would do if they were the principal of the school.

## Science

The class took a trip into the great outdoors to research the forest and make entries into their own scientific journal. They found some interesting bugs and plants outside to write about.

## Social studies

Students learned about the impact of different species on the environment and how they impact the economy, nature, and society.

## Math

The class learned all about Quadrilateral shapes and patterning. They then used their knowledge to create animals like crocodiles and spiders.

## For June,

We'll attend green school and finish up our assignments for the year.

**SEE YOU NEXT TIME!**
