GREEN SCHOOL Edition

The moment finally came, students were eagerly waiting for Green School this month, and in the blink of an eye, it went by so fast. The children started their first day with a beautiful walk through a forest or various outdoor activities at Adventure Park Gdynia Kolibki. On the second day, we had some fun interactions and observations with animals from a zoo in the Charlotta Valley. Then we went on an intense adventure, walking on hills of sand from Czołpińska Dune to the Baltic Sea. On the third day, we started our morning learning about life in a rural homestead from 100 years ago and made soap with basic ingredients. We later moved on to learn about historical information with technology devices at the Lighthouse Keepers' Settlement. On the fourth day, we hiked a trail and walked over a swamp in Gałaźnia Mała and ended our day at a waterpark. To end our trip, we went to Torun to learn and make gingerbread cookies at the Living Museum of Gingerbread.
