

Grade 4 June Newsletter

Language Arts...

Grade 4 students truly deserve a pat on the back for consistently working hard until the end as we wrap up an incredible school year. They showed great determination in completing both the Cornerstone Textbook and Workbook. For the last writing assignment as Grade 4 students, the children were very well-focused when paraphrasing a source based on their topic of interest and wrote an excellent summary. Grade 4 students obtained various new skills in Language Arts and I'm proud to see how far they have come.

Math...

Students looked at calculating measures of central tendency, focusing on mean, median, mode and range. They completed a frog jumping activity and reviewed multiplication.

Science...

Grade 4 students have been going over previous lessons that they did in the last couple of months, to ensure they understand and remember everything. They have enjoyed revising lessons the last couple of lessons.

History...

Students learned about some interesting places around the world, for example: Easter Island and Castillo de Kukulcán. Students were able to see these locations on Google Earth and explore them as a class.
