

Grade 5 *June* Newsletter

Language Arts...

The students have learned how to create digital art and lots of hands on craft during the Art project. They have also been practicing how to report statements and questions in pairs and small groups. The students have really enjoyed improving their English skills this year.

Math...

We calculated the measures of central tendency, focusing on mean, median, mode and range. This worked as we gathered a set of data from jumping frogs. We also reviewed multiplication of double digits.

Science...

The students have been recapping previous lessons just to understand some of the things they have learned in more detail. For example; root transformations, photosynthesis and our lessons on non-flowering plants. The students also got the chance to attend a DIY workshop where they learnt how to plant and grow their own lavender plant

History...

Students learned about Marco Polo, Venetian merchant, explorer and writer who travelled through Asia along the Silk Road between 1271 and 1295. They looked at a short video and talked about his achievements, as well as the journeys of Zheng He and Ibn Battuta.
