

# September

## Grade 0 Newsletter – September in Review

### Introduction...

We had a busy month making new friends, learning about our new class family and all about our school!

### In English Language,

We began learning letters of the alphabet! We've learned the names and sounds of letters A-E and also read a story about each one. We also learned about prepositions and question words!

### In Mathematics,

We counted from 1-10 forwards and backwards and also practiced spelling them with our song "Let's Learn Our Numbers!" We practiced subitizing with a football themed game and worked on writing our numbers as digits and words.

### In Social Studies,

We identified members of our families and worked on making a family tree! We used our creativity to make a unique family tree too!

### In Science,

This month in Grade 0, we explored the Four Seasons and Weather! Students participated in coloring activities and conducted a rain cloud experiment using shaving cream, ink, and water to learn how clouds create rain.

### In Art,

We named the primary colors, red, yellow and blue and learned how they make green, blue and purple! We played a primary color pairs mixing game and also fingerpainted our own primary and secondary color chart!

Happy September!

Miss Kelly
