

# 7TH GRADE

## JANUARY NEWSLETTER

### LANGUAGE ARTS

Last week the students wrote a compare and contrast essay, detailing the differences and similarities between themselves and a close friend. They have also been having weekly mock tests and studying the complex vocabulary words in their Student Edition in preparation for Spelling Bee.

### HISTORY

Grade 7 students learned about the cultural revolution, democracy, political parties, the revolution in Russia in 1905, the Triple Alliance and the Antande. They began working on their next Google Slides projects in groups that deal with World War II.

### MATHS

Students reviewed the triangle sum theorem and looked at measuring angles with protractors. They created their own animals from different triangles. We also began our unit on equations. First, we looked at combining like terms and naming the different parts of the equation.

### SCIENCE

This month, Grade 7 began learning about the excretory system and how the kidneys work. We explored how the body filters and removes waste, helping us understand the importance of this amazing system.
