Newsletter Grade 4

Language Arts

This month the students have been preparing for the Spelling Bee contest by practicing in pairs in class. The students also have an advertising project that they have been working on and will present it in a few weeks time.

Math

Students continue to work on fractions. We looked at identifying equivalent fractions. Students were able to label and draw different parts of a whole. We also looked at comparing fractions with different denominators. Students were able to write which fractions were greater than, less than or equal to each other.

Science

Our studies focused on ecosystems and how living and nonliving things interact. We watched an educational video and engaged in class discussions to explore these relationships. We started working on a poster presentation about the different biomes on our planet, which we will continue next month.

History

This month students began learning about the City from the Sea and the Second World War. They were able to learn about how the Polish people fought for their freedom and country during the war and how even the youngest of scouts would help.
