

# February

## Grade 0 Newsletter - February in Review

### Introduction

We've jumped back into the swing of school following winter break. We've officially begun working on our Chromebooks and also started our "Fun Fridays!"

### Language Arts

We learned word families, including -ING and -OP! We made crowns as the newly appointed kings and queens of -ING and rapped to our "O-P OP" song. We made eyeglasses so we could use our "writer's eyes" to check our writing for capital and lowercase letter, punctuation and spelling!

### Mathematics

In math, we used qualitative language like more, most, least and less to describe and compare objects. We completed a sorting activity whereby we put Lady Bug and Gent Bug's cookies into their proper jars - then enjoyed some of our own delicious cookies!

### Social Studies

We looked at different habitats around the world and the types of plants and animals that live in them. We worked on our "My Habitat Book." We will finish the month learning and writing about landforms!

### Science

This month, we explored the planets in our solar system and discussed why Earth can support life while others cannot. We also started making our own models of the solar system, which we will continue next month.

### Art

We made Valentine's Day art, like mandala hearts and Valentine's crafts. We also learned about different types of lines: wavy, curvy, straight and zig-zag. Finally, we studied symmetry!

## Pictures, pictures, pictures!

### Important Dates:

March 20th - Spelling Bee (Class Rounds)

March 27th - Spelling Bee (Finals)

April 7th - Individual Parent-Teacher Meetings for Grades 0 and 1

April 8th - Individual Parent-Teacher Meetings for Grades 2 and 3
