

LANGUAGE ARTS

The highlight of this month would be the English expressions and idioms that the students have been learning to use. They have practiced how to use idioms in sentences by roleplaying different scenarios. The students also presented their advertising projects in class. Some of the students brought in products they were advertising.

MATHEMATICS

Students continued to work on the fractions unit, and created a pizza fraction project. They worked on improper fractions and mixed numbers. They learned a little bit about pi and what the number represents. They were also able to eat a pi day cookie.

HISTORY

Students learned about Ancient Egypt. They looked at Pyramids and the Sphinx, as well as the ancient writing and use of hieroglyphs. They practiced their hand at this ancient text and wrote about ancient Egyptian gods.

SCIENCE

Students have been learning about different biomes, including their climate, geography, animals, and plants. In groups, they created posters about biomes and presented them to the class. Next month, we will begin learning about dinosaurs!
